The accompanying notes are an integral part of these condensed consolidated interim financial statements

1. NATURE OF OPERATIONS AND GOING CONCERN

Black Dragon Gold Corp. (the "Company") was incorporated under the laws of the Province of British Columbia on August 20, 2007, and is classified as a junior mining issuer with the Australian Securities Exchange (the "ASX"). On February 28, 2019, the Company voluntarily delisted from the TSX Venture Exchange ("TSX-V") and continued to trade on the ASX. The Company's head office address is Ground Floor, Regent House, Rodney Road, Cheltenham, Gloucestershire, GL50 1HX, U.K. The registered and records office address is 1000 Cathedral Place, 925 West Georgia Street, Vancouver, BC V6C 3L2.

These unaudited interim consolidated financial statements have been prepared assuming the Company will continue on a going-concern basis. The Company has incurred losses since inception and the ability of the Company to continue as a going-concern depends upon its ability to develop profitable operations and to continue to raise adequate financing. Management is actively targeting sources of additional financing through alliances with financial, exploration and mining entities, or other business and financial transactions which would assure continuation of the Company's operations and exploration programs. In order for the Company to meet its liabilities as they come due and to continue its operations, the Company is solely dependent upon its ability to generate such financing. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern.

There can be no assurance that the Company will be able to continue to raise funds, in which case the Company may be unable to meet its obligations. Should the Company be unable to realize its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts recorded in these financial statements.

The unaudited interim consolidated financial statements for the period ended March 31, 2020 do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

On May 1, 2018, the Company completed a consolidation of its issued and outstanding common shares on the basis of three (3) pre-consolidation common shares, options and warrants to one (1) post consolidation common share, option and warrant (the "Share Consolidation"). The Share Consolidation has been presented throughout the consolidated financial statements retroactively and all equity related issuances are presented on a post consolidation basis.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

These unaudited condensed consolidated interim financial statements for the three months ended March 31, 2020 are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the International Financial Reporting Interpretations Committee ("IFRIC"). These unaudited condensed consolidated interim financial statements have been prepared using the same accounting policies and methods of application as the Company's most recent annual audited consolidated financial statements. These unaudited condensed consolidated interim financial statements do not include all information and disclosures required in audited consolidated financial statements and should be read in conjunction with the Company's December 31, 2019 audited consolidated financial statements.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PREPARATION (cont'd...)

New accounting standards and interpretations adopted during the year

As at the date of these financial statements, the following standards have been applied in these financial statements:

(i) IFRS 16 – New standard to establish principles for recognition, measurement, presentation and disclosure of leases with an impact on lessee accounting, effective for annual periods beginning on or after January 1, 2019.

(ii) IFRIC 23 - New standard sets out how to determine the accounting tax position when there is uncertainty over income tax treatments. IFRIC 23 requires an entity to determine whether uncertain tax positions are assessed separately or as a group; and assess whether it is probable that a tax authority will accept an uncertain tax treatment used, or proposed to be used, by an entity in its income tax filings. IFRIC 23 is effective for annual periods beginning on or after January 1, 2019.

The adoption of the above standards did not have an impact on the consolidated financial statements of the Company.

4. EXPLORATION AND EVALUATION ASSETS

Salave Gold Property

The Salave Project is comprised of 30-year-term mining concessions over the resource area. On January 23, 2018 the Company announced that it had commenced an exploration drilling program on the Salave Gold Deposit ("Salave" or "Salave Project") in Asturias, Spain, following the receipt of approval from the Asturias Ministry of Employment, Industry & Tourism, as well as the Municipality of Tapia de Casariego. This drilling program was completed in April of 2018.

A Preliminary Economic Assessment of the Salave project was performed in 2018 and on February 11, 2019 the Company announced results of the PEA. The PEA is based on the recently completed Mineral Resource Estimate completed by CSA Global.

Although the Company has taken steps to verify title to its mineral property in which it has an interest, these procedures do not guarantee the Company's title. Its property may be subject to prior agreements or transfers and title may be affected by undetected defects. Further, we make judgements for properties where concessions terms have expired, and a renewal application has been made and is awaiting approval. We use judgement as to whether the concession renewal application is probable to be received, but ultimately this is beyond our control. If a renewal application is not approved, we could lose rights to those concession.

8. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Fair value

The inputs used in making fair value measurements are classified within a hierarchy that prioritizes their significance. The three levels of the fair value hierarchy are:

- Level 1 Unadjusted quoted prices in active markets for identical assets and liabilities;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 Inputs that are not based on observable market data.

The carrying value of receivables and accounts payable and accrued liabilities and loan facility approximated their fair value because of the short-term nature of these instruments. Cash and cash equivalents are measured at fair value using Level 1 inputs.

Financial instruments measured at fair value on the consolidated statements of financial position are summarized in levels of fair value hierarchy as follows:

Assets	Level 1	Level 2	Level 3	Total
Cash and equivalents	\$ 1,389,860 \$	- \$	- \$	1,389,860

8. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

The Company has exposure to the following risks from its use of financial instruments:

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's cash is held at large financial institutions and it believes it has no significant credit risk.

Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they fall due. The Company manages its liquidity risk by forecasting cash flows from operations, and anticipating investing and financing activities. As at March 31, 2020, the Company had current assets of \$1,516,235 to settle current liabilities of \$450,570 which either have contractual maturities of less than 30 days and are subject to normal trade terms or are due on demand.

Market risk

Market risk is the risk of loss that may arise from changes in market factors, such as interest rates and foreign exchange rates.

a) Interest rate risk

Interest rate risk is the risk due to variability of interest rates. The Company is exposed to interest rate risk on its bank account. The income earned on the bank account is subject to the movements in interest rates. The Company has cash balances and no-interest bearing debt, therefore, interest rate risk is nominal.

b) Foreign currency risk

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The Company funds certain operations, exploration and administrative expenses in Spain by using Euros converted from its Canadian bank accounts. Management believes the foreign exchange risk derived from currency conversions is negligible and therefore does not hedge its foreign exchange risk. Based on the Company's Euro denominated financial instruments at March 31, 2020, a 10% change in exchange rates between the Canadian dollar and the Euro would result in a change in foreign exchange gain or loss.

9. CAPITAL MANAGEMENT

The Company's capital structure consists of shareholders' equity. The Company's objective when managing capital is to maintain adequate levels of funding to support the development of its business and maintain the necessary corporate and administrative functions to facilitate these activities. This is done primarily through equity financing, selling assets, and incurring debt. Future financings are dependent on market conditions and there can be no assurance the Company will be able to raise funds in the future. The Company invests all capital that is surplus to its immediate operational needs in short-term, high liquid, high-grade financial instruments. There were no changes to the Company's approach to capital management during the year. The Company will need to raise additional capital by obtaining equity financing, selling assets and incurring debt to develop its business.

10. SUBSEQUENT EVENTS

Subsequent to March 31, 2020, the Company:

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or results of operations at this time.
